March 29, 2012

To my current and prospective clients:

I'm excited about what's going on in 2012; both in my own business and in my clients businesses too. There are great opportunities for small businesses to succeed this year. The door is open and all we have to do is walk through it. And as I like to say, "When you find an open door, walk through it. If there is no door, make one!"

I am very blessed to be teaming up with some great clients this year involving long term projects that will bring fantastic results to those whom I am glad to serve:

1. Western Leaf Electronics, Inc., of Calgary Canada and Houston Texas
 - Have been retained by Western Leaf to manage all aspects of print sales materials
 - Overseeing graphic design elements
 - Developing sales and marketing materials to attract new distributors as well as for retail use.

2. Brain Host Web Hosting of Brunswick, Ohio
 - Have been retained to develop a wide variety of sales / promotional materials and web articles for a very popular and high ranking web hosting company in the U.S.

I am also working on various copywriting, social media promotion, web and graphic design projects that come from various sources. Needless to say I am always busy (which is a good thing), but I'm never too busy to help you succeed in business too!

I would love to provide whatever assistance I can in helping you succeed in 2012, and beyond.

Best regards,
